TH Nong Bua Lamphu · Thailand

SKILLS

Languages

C# · TypeScript · JavaScript · Java · SQL · HTML / CSS / SCSS

Frontend

Angular · React · Next.js · DevExtreme · SyncFusion · Bootstrap

Backend

.NET (C#) · RESTful API · Node.js · Spring Boot (Java) · Entity Framework

Data & BI

Tableau · SQL Server / MSSQL · Stored Procedure · Data Modeling

AI Tools

Claude · ChatGPT · Gemini · Kimi

Tools & Platform

Git · GitHub · Postman · Visual Studio / VS Code · Android Studio · Vercel · Figma

Network & Hardware

LAN / Cat6 Cabling · Router & Switch Config · Wi-Fi / Access Point · CCTV (IP / Analog) · Arduino (IoT)

EDUCATION

Udon Thani Rajabhat University

Bachelor of Science — Computer Science
GPA: 3.14 / 4.00

2017–2021

Relevant: Data Structures, OOP, Database Systems, Web Development, Networking

HIGHLIGHTS

Full Stack Developer · .NET + Angular · Next.js / React · Tableau BI · AI-Assisted Dev · Network & CCTV · 4+ Years Exp.

Software Developer

Full Stack Developer with 4+ years of experience in enterprise software and freelance projects. I turn business requirements into working web applications, APIs and dashboards using **.NET**, **Angular**, **React** / **Next.js** and **Tableau**. I enjoy finding the cause of a problem and taking a solution through to delivery. I also build Android apps with **Java**, install network and **CCTV** systems, and use AI tools while checking the business logic myself.

WORK EXPERIENCE

Multita Co.,Ltd. — Software Developer

Jul 2022 – Jul 2026

Full-time · Remote (Udon Thani / Khon Kaen)

Key Responsibilities:

- Designed and developed enterprise web applications for healthcare, insurance and retail clients, working across **Angular (TypeScript)** frontends and **.NET (C#)** backends.
- Built user interfaces with **SyncFusion** / **DevExtreme** and connected them to **RESTful APIs**, bringing screen workflows and backend data processing together.
- Designed data structures and pipelines for business intelligence. Built **Tableau** dashboards for Cash Conversion Cost analysis so finance teams could monitor cash flow in near-real-time.
- Developed and maintained Android applications for sales and motor-insurance workflows using **Java** in Android Studio.

Notable Projects:

- Sikarin Hospital — HIS: Developed patient-data management modules within the Hospital Information System using **Angular** and **.NET** to support hospital workflows.
- IRPC — BI reporting: Worked as a **Tableau** Developer for the energy sector, creating in-depth reports and dashboards to support executive decisions on refinery operations.
- TQM & Viriyah — Motor insurance: Built frontend interfaces for a high-traffic car-insurance platform, supporting insurance workflows and concurrent users.
- PUMPUUI — Retail Android app: Developed sales and inventory functionality with **Java** in Android Studio to support day-to-day retail operations.

Freelance & Technical Consultant

Sep 2023 – Present

Self-employed · Remote

- Build enterprise interfaces with **Angular** / **DevExtreme** and public-facing websites with **React** / **Next.js**, with attention to speed and search visibility.
- Design **RESTful APIs** with **.NET** and **Node.js**, connect **SQL/NoSQL** databases, and keep the code organised for maintenance.
- Work with clients to clarify requirements, choose an approach and deliver the project, taking responsibility from system design to handover.

Network & CCTV Installation — Independent Technician

Mar 2026 – Present

Part-time · Weekends & spare time · Nong Bua Lamphu / Udon Thani

Scope & Responsibilities:

- Survey sites, measure cable routes and prepare equipment lists with 2–3 budget options, explaining cost, coverage and equipment lifespan before purchase.
- Install **Cat5e/Cat6** cabling, **RJ-45**, switches and access points. Configure WAN/PPoE, subnets, **DHCP**, Wi-Fi security, port forwarding and channels to reduce interference.
- Install IP/analog **CCTV**, plan camera coverage, wire power/**PoE**, configure **NVR/DVR** storage and retention, motion recording and remote mobile viewing.

CHAREON TUT Co.,Ltd. — Full Stack Developer (Intern)

Nov 2021 – Feb 2022

Internship · Pathum Thani

- Implemented **Angular** interfaces with **TypeScript**, HTML and SCSS, following the design and checking layout details.
- Built **Java** / **Spring Boot** backend modules using MVC to separate business logic from data access.
- Took part in requirements analysis, implementation, testing and delivery within the development team.

CERTIFICATIONS

- NSC 2020 — Smart Elder** · NSTDA · 6 March 2020
 - Advanced Installation Cabling System — Course 2** · INTERLINK · 26 April 2016
- Original certificates and course details follow.
